YOUNGPLANTS CATALOG 2023

Stefan Slijkerman

slijkermankalanchoë

3rd generation family company since 1946

History

Founder Cor Slijkerman started in 1946 with the cultivation of vegetable crops. Later, when the first greenhouses appeared, he started growing gerberas and pot chrysanthemums. When his son Johan Slijkerman (2nd generation) took over the company, a switch to the growth of Kalanchoë was made and in 2001 he started breeding his own varieties. Nowadays, Stefan Slijkerman (3rd generation) takes the daily lead of the international operating organization.

Breeding

Our team of qualified staff is working on new innovative Kalanchoë varieties, using modern techniques every day. Time and again we pioneer in creating new colours, new cultivation methods and a better shelf life. We have varieties suitable for different pot sizes and climate circumstances, providing growers worldwide a distinctive assortment.

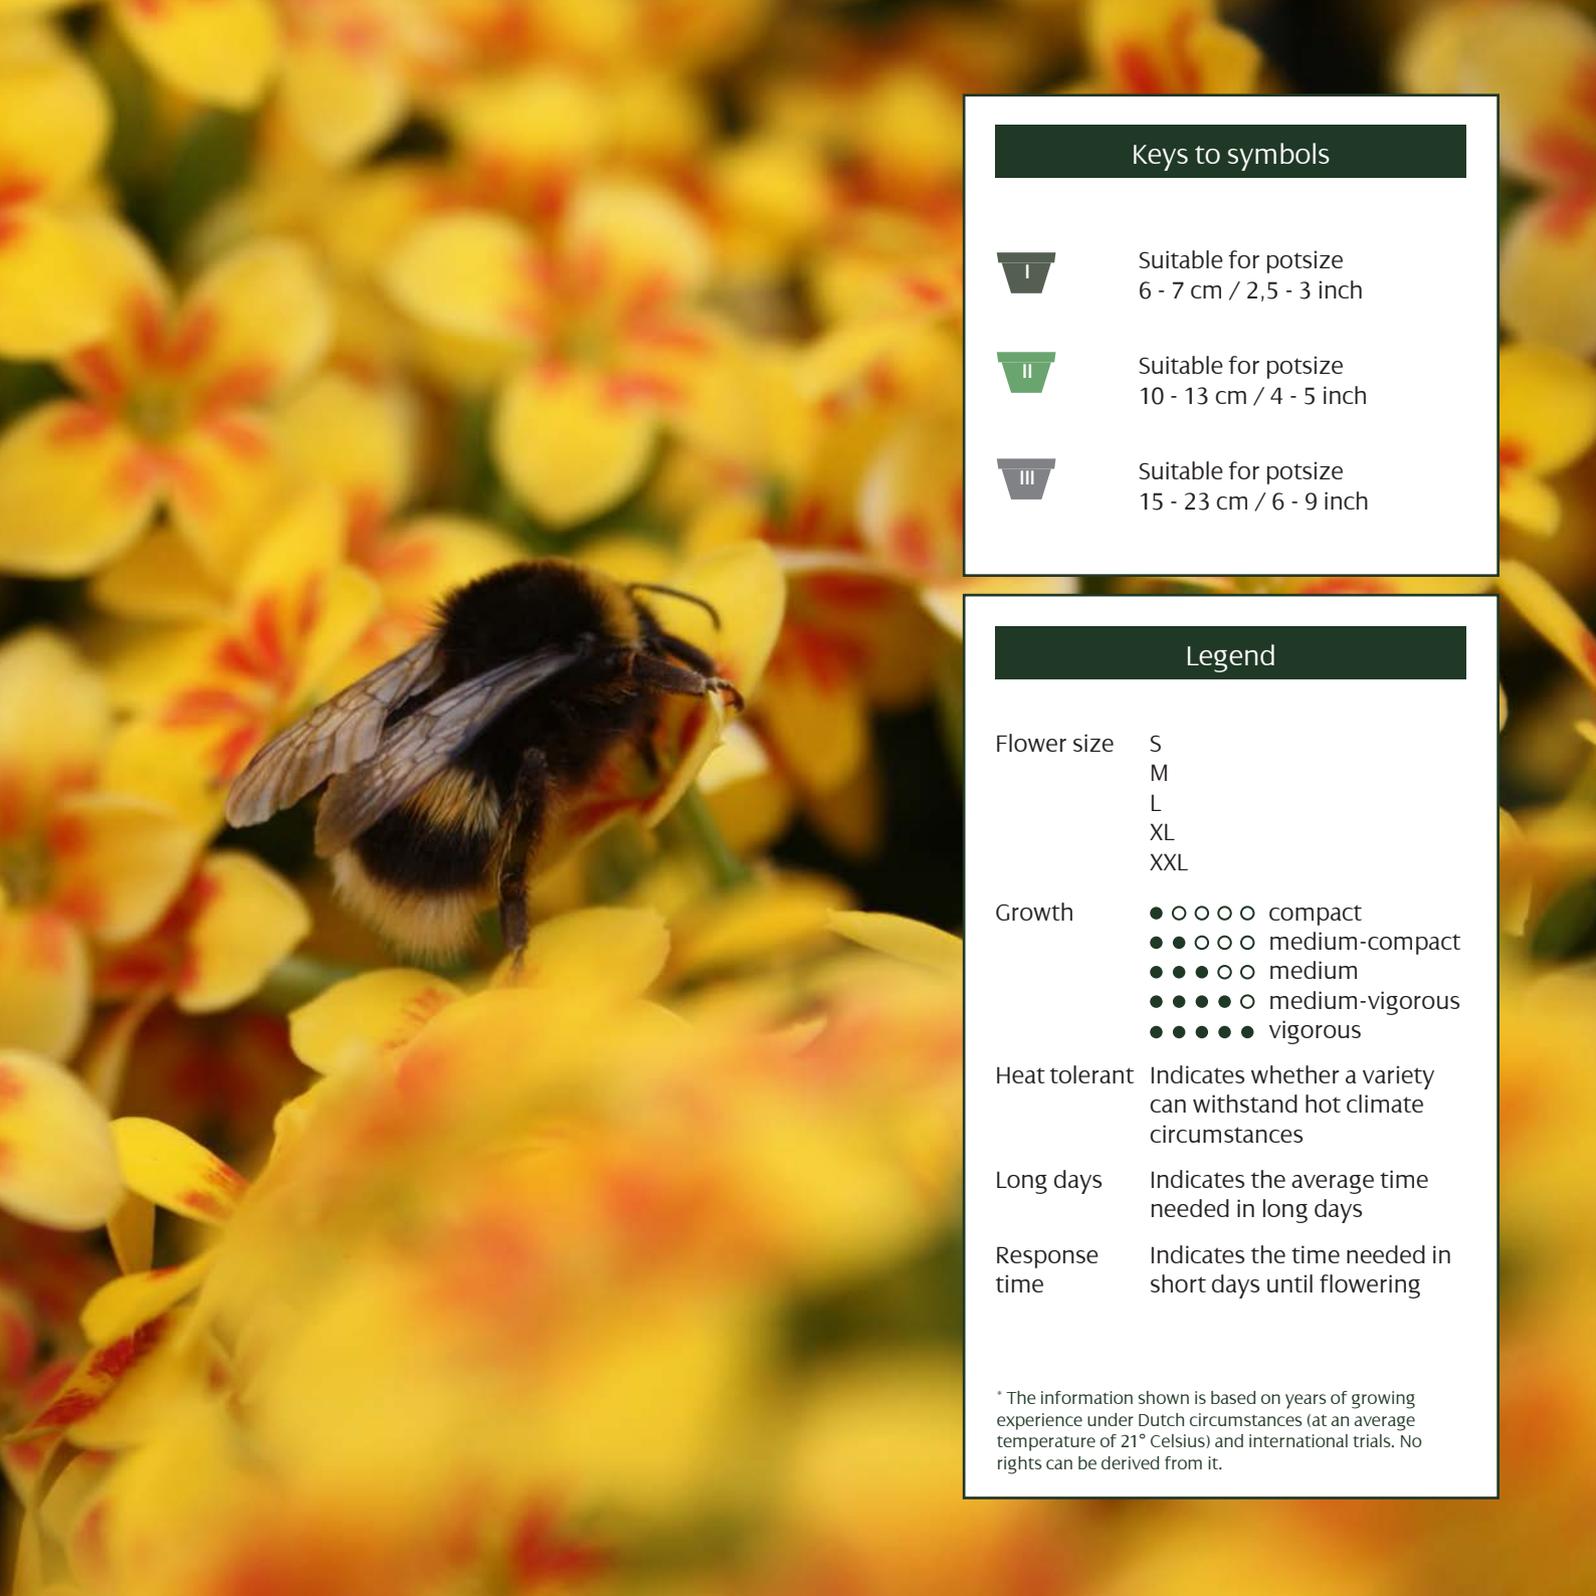

Youngplants

We have over 35 years of experience in selection and cultivation of Kalanchoë cuttings. We produce our cuttings at several production sites all across the world, with respect to our people and the planet. This provides our customers a good start of the growth with fresh quality cuttings at anyplace, anytime.

Production

We produce flowering Kalanchoë in a highly automated greenhouse of 50.000 m² in The Netherlands. We do this in a sustainable way, for which we make use of biological crop protection. As a result, we are MPS Product Proof certified. Our production facility gives growers the opportunity to experience our varieties in a practical environment.

Growth ●○○○○ compact
●●○○○ medium-compact
●●●○○ medium
●●●●○ medium-vigorous
●●●●● vigorous

Heat tolerant Indicates whether a variety can withstand hot climate circumstances

Long days Indicates the average time needed in long days

Response time Indicates the time needed in short days until flowering

* The information shown is based on years of growing experience under Dutch circumstances (at an average temperature of 21° Celsius) and international trials. No rights can be derived from it.

Tiger® Kalanchoë

EN

This Tiger® Kalanchoë series consists of varieties that are characterized by contrasting flowers with beautiful drawings, the typical dark eyes in the flowers. The powerful look of the plants fit the strong appearance of the tiger, to which it owes its name.

NL

De Tiger® Kalanchoë serie bestaat uit rassen welke worden gekenmerkt door contrasterende bloemen met prachtige tekeningen. Door de typerende donkere ogen in de bloemen en het stoere uiterlijk van de planten passen de rassen uit de serie zeer goed bij de krachtige vertoning van de tijger, waaraan het de naam dankt.

Diamond® Double Collection

KALANCHOË

DIAMOND®

EN Diamond is the hardest material found in nature and has also been loved for centuries for its beauty and purity. This also characterizes the double-flowered varieties from the Diamond® collection, which are specially selected for bright colors and above-average shelf life.

NL Diamant is het hardste materiaal dat in de natuur voorkomt en wordt eeuwenlang bemind voor haar schoonheid en zuiverheid. Dit kenmerkt ook de gevuldbloemige variëteiten uit de Diamond® collectie, welke speciaal geselecteerd worden op heldere kleuren en een bovengemiddelde houdbaarheid.

Diamond® Single Collection

KALANCHOË

DIAMOND®

EN

The word diamond is derived from the Greek 'adamas' which means invincible and indicates eternal fidelity. The single-flowered Diamond® collection has been specially selected for its above-average shelf life and is also suitable for outdoor use from 15 May to 15 September.

NL

Het woord diamant is afgeleid van het Griekse 'adamas' dat onoverwinnelijk betekent en duidt op eeuwigdurende trouw. De enkelbloemige variant van de Diamond® collectie is speciaal geselecteerd op bovengemiddelde houdbaarheid en is tevens geschikt voor buitengebruik van 15 mei tot en met 15 september.

Serenity® Series

EN Trendy sweet pastel colors, that characterizes the Serenity® series. With no fewer than 15 different colors, there is always a suitable variety for everyone. From a technical point of view, the series is loved by growers due to the minimal PGR requirement and identical characteristics, making it easy to make combos.

NL Trendy zoete pastelkleuren, dat kenmerkt de Serenity® serie. Met maar liefst 15 verschillende kleuren is er altijd voor iedereen wel een geschikte variëteit te vinden. Teelttechnisch is de serie geliefd onder kwekers door de minimale rembehoefte en gelijke eigenschappen waardoor deze gemakkelijk gecombineerd kan worden.
